

Air Force School Kalpi
Report on Sand Castle Making Activity

A joyful and creative Sand Castle Making Activity was organized for the students of Pre-primary to enhance their sensory skills and creativity. The activity was conducted within the school premises in a safe and playful environment.

The tiny tots participated with great enthusiasm and excitement. With the help of sand, water, and simple moulds, the children created beautiful sand castles and shapes. Teachers guided them throughout the activity, encouraging them to explore different textures and forms. The activity not only provided fun but also helped in developing fine motor skills, hand-eye coordination, and imaginative thinking.

The young learners enjoyed getting their hands messy and working together with their peers. Their cheerful smiles and laughter made the atmosphere lively and engaging.

Overall, the activity was a great success and proved to be an enjoyable learning experience for the children. It also helped in building teamwork, confidence, and a love for creative expression at an early age.
